PERSONAL SUMMARY

A second year BSc Computer Science student at Sheffield Hallam University with an extensive background in computers and various software; ranging from office applications to programming and graphic design software. Excited to take my first step into the IT industry and expand my current knowledge within this field.

EDUCATION

BSc (HONS) COMPUTER SCIENCE, Sheffield Hallam University, 2017 – 2021

1st year – Overall 74% First Class Honours

2nd year - Modules include: Algorithms and Data Structures 2, Database Systems for Software Applications, Fundamentals of Programming Languages, Group Software Development Project, Object-Oriented Programming for Computer Science, Software Engineering: Concepts and Methods.

Silverdale School, Sheffield, 2010 - 2017

A-Levels: Biology(C), Psychology(A), Geography(C)

AS: Chemistry(D)

GCSE: 9 GCSEs grade A-C

WORK EXPERIENCE

HM Revenue & Customs, 2014

- Gained knowledge and experience in using Microsoft Excel, making and amending various spreadsheets and organising data of individuals.
- Grasped an understanding of a worker's union and why they're necessary for all modern workplaces.

Asian Radio Live, 2014

- Achieved a basic understanding of how to set up an internet radio station.
- Gained experience in audio editing software such as Adobe Audition and Audacity.
- Formed a basic understanding of audio engineering in relation to computer hardware and software.
- Successfully completed a research project to design and create a mock radio programme using skills and techniques I had gained while there.

KEY SKILLS

IT skills

- Years of experience using various computer software, including Microsoft Office (Word, PowerPoint, Excel etc), Microsoft Visual Studio and various other IDEs.
- Advanced knowledge in programming with experience using C++, C# and JAVA.
- Understanding of web development and design with experience in HTML, CSS, JavaScript and libraries such as React and jQuery.
- Basic understanding into databases with experience using SQL and php.

Teamwork and interpersonal skills

- Able to work effectively in groups due to my enthusiasm in having a dedicated role in a team. This also pushes me to work beyond my standard, so I don't let the team down.
- Participated in various group projects during my first year of university and successfully worked with new people each time to complete tasks.
- Able to empathise with other people easily, which helps to understand other team members' problems and solve them.

Communication

- Decent communication skills determined to be real and practical with people which allows me to effectively devise strategies and produce solutions that result in both parties being content.

Individual skills

- Able to work autonomously and efficiently.
- Have the initiative to learn and adapt to unfamiliar situations such as new software or concepts.

INTERESTS AND ACHIEVEMENTS

Martial Arts Tricking - Training for 4 years, the sport involves gymnastic somersaults mixed with martial arts kicks. Have attended multiple Tricking gatherings and competitions.

Breaking – Break Dancing is a new interest I have, it compliments my tricking as it's another form of free movement, I use it as an outlet to express myself and style.

Graphic Design – Excelled at photoshop in GCSE photography and have used these skills to produce logos and poster designs for people via commissions.

Hackathon – Attended and competed in the Major League Hacking Hackathon, Hack Sheffield at the University of Sheffield.
